Editor: D.F. Geesaman

The authors regret to inform that they have found a mistake in the error propagation in one of the calculations of this work. At the end of the left column in page 5, the uncertainty associated to 826 mb should be 57 mb, and not 107 mb. In the error propagation for the sum of the two partial MACS values, the formula for a

product of two values was applied instead of that for the sum of two values. The total MACS value is hence 826(57) mb instead of 826(107) mb.

The authors would like to apologise for any inconvenience caused.
