A Really Great Paper with Excellent Bibliography

Jane Q. Physicist
Stanford Linear Accelerator Center
Stanford University, Stanford, California 94309

January 17, 2013

This paper is pretty eclectic, since it cites a buch of diverse things. Of course, since it has no content, that is perhaps not so difficult.

Primarily I want to refer the reader to Brodsky and Wu's recent work on the renormalization group[1], which is relatively unrelated to the recent work by Beacom, Bell, and Dodelson [2]. I should also point out that the paper by Kreitz and Brooks [3] is being cited here in a purely self-serving manner.

There are many papers by Dixon and others that I'd like to point out here [4, 5, 6]. In particular I wish to point out that the work done in [6] is irrelevant to this paper.

There are some items in the paper [7] which I would like to draw your attention to, but it is likely that as above, I may be citing this for the wrong reasons.

Here, let me make a mistake citing this paper [?].

I had better cite the most recent Review of Particle Properties [8], since that gets quite a lot of cites, while citing a few papers about stringy topics [9] is also worthwhile. No paper is complete without a cite to some extra-dimensional papers like [10, 11].
